[Temporary Jobs [2016 - 2018

Customer Service Center.

Work in a family business providing foreign exchange services, Change.

MY SKILLS

Large scale Project (java server, Angular client) that reveals RESTful API:

Build a Coupon management system that allows Companies to Produce Coupons as part of their campaigns.

The project consisted of three stages: Build the system core with JDBC, then refactor the system server using spring boot & JPA Hibernate technologies, and the third stage was Communication between the server and Angular by using RESTful API, and Exposing the website to the Internet.
